“Aside from costing a third of what we were paying, we replaced all of our Motorola CP200s with TR200s because of the superior sound quality”

- Brad McDonald, President
Orson Gygi

“Having half the weight of our old radios, the TR200 allows our sales staff to finally use radios again. No more complaints about being too heavy or tugging on their pants and skirts. We bought the TR200 for all of our stores”

- Veronica Ruelas, Purchasing
A’GACI

“As a large mining company we use the TR200 while working on our draglines because we feel it is a tough radio.”

- John Reidy
BHP Billiton

“Our School recently bought some Titan TR200s, talk about a workhorse radio!”

- Asher Saxton, Stage Manager
American Leadership Academy

Why is the **TR200** and **TR400** Titan Radio becoming so popular?

Lightweight and Ergonomic

Both the TR200 and TR400 are convenient and compact. No other radio on the market combines the features, battery life and power into such a small ultra-lightweight radio. The design of the radios were engineered to be simple and easy to use. No complicated display or useless buttons. The Titan Radio portables are truly a “turn-key” radios.

Durable and Warranted

How durable and tough are the Titan Radios? Real-life testing wasn't extensive enough for the Titan Radio engineers. They subjected both radios to extreme testing, which included dropping it off 30 foot platforms and running it over with motorized vehicles! They even had a demolition and drilling company demo the radio, making sure it could withstand the rigorous events of daily construction work. Because Titan Radio stands behind this testing, there is up to 3 years of warranty coverage on both products.

High Powered and Repeater Capable

Titan Radios provide the ultimate combination of size, strength and power. The Titan Radios are up to 2X as powerful as its leading competitor in size and it can be up to 77% lighter than any of its competing 2 and 4 Watt radios. Both Radio's audio quality is also more superior than any other radio in its class. Don't believe it, then demo it and compare. By the way, both radios are repeater capable making them adaptable and dynamic.

Computer Programmable with a Programmable Button

Any of the 16 channels on the TR200 can be programmed UHF and you get the TR400 in either UHF or VHF. They also has a short press and long press programmable button(s) to enable features such as power adjust, monitor, priority scan, voice scrambler, VOX and battery indicator...to just name a few. Hook either up to a computer using the Titan Radio software and cable and you are on your way. Wide or narrow band is not a problem for either radio, making it compliant with the recent FCC mandate.

Cost Effective and Economical

After listing all the amazing features above we still haven't gotten to the Titan Radios best feature, Its PRICE! We all know that in this economic time, price, along with quality, truly matters. We promise you will find that the value and cost effectiveness of either Titan Radio will not be surpassed. A business class, high powered, ultra-lightweight, PC programmable, warranted radio for under \$300 and \$400... That is a Titan Radio!

ACCESSORIES
